Re: Updating the minimum emission standard for new road vehicles

To whom it may concern,

I am writing to respond to the consultation on the proposal to update the minimum emission standard to Euro 7. You will find the Fuels Industry UK response attached.

Fuels Industry UK represents the companies that manufacture and supply over 85% of the UK's transport fuels, investing in sector-wide transformation to help the country reach net zero. That includes conventional and lower carbon alternative fuel suppliers alongside terminal and pipeline operators.

We welcome the opportunity to respond to the consultation on updating the emission standard, in which we provide support for the update in principle provided unintended consequences on fuel quality, supply and cost are avoided. We are happy to discuss our response with you in further detail.

Yours faithfully,

Daniel Greenblatt
